**Objective of the course:**

As has already been examined in the last semester through an intensive study of the general principles of contract, the essence of all commercial transactions is but regulated by the law of contract. The expansion of commercial activities at a global market environment makes the understanding of the law of contract even more critical. Further, a lucid understanding of the fundamental principles of Special Contracts facilitates not only resolving the disputes arising out of such contracts but also in the drafting of contractual instruments. The law of Special Contracts is marked by the peculiar and mostly predictable legal relationship subsisting between the parties. The frequency of these kinds of transactions in the affairs of men has led to the development of established rules of prescriptions and prohibitions determining the implications and permissible possibilities of these kinds of contractual relations. The fundamental principles of contractual relations continue to apply the special forms of contract unless specifically excluded; as in case of the rule of consideration in case of contract of agency.

**Student Outcome:**

The primary goal of this course is to acquaint the students with the basics of Special Contracts and enable them to grasp the nuances of the contractual transactions involving these forms of contracts. They will be able to determine the legality of the transactions and also the rights and duties of the parties thereto. They will also be able to purposefully deal with the disputes arising out of such contractual arrangements.

**Value addition:**

This course is designed keeping in view the student perspectives to understand the applicability of contract law in day to day life. It aims to equip the students with the implication of contract law so as to enable them to deal effectively with the various disputes related to contracts in diverse fields.
